ULYSSES JOHN CUNANAN

FRONT END DEVELOPER

Summary

A 4th year college and a passionate front-end developer that is eager to learn and collaborate. I love designing websites as well as developing them. Proficient in numerous programming languages including HTML, CSS, JavaScript, C#, Java, Python, and SQL.

Tools and Frameworks

- ReactJS
- Bootstrap
- Git
- Figma
- Photoshop
- Vite

Projects

Weather Forecast Website

Stack: VanillaJS, HTML, CSS, OpenWeatherAPI

Link: <https://johncunanan.github.io/Weather-Forecast/>

A weather forecast app where you can view the current weather information of a searched city.

Attendance System Using Face Recognition

Stack: Python, OpenCV, SQL, Tkinter

Link: <https://github.com/JohnCunanan/Face-Recognition-Attendance-System>

A capstone project which recognized the faces of the employees and records their attendances.
